# Day 2 Closing EES2 Workshop #8

Tina Kaarsberg, PhD  
EES2 Workshop Co-Chair

July 20 2023

<https://microelectronics.slac.stanford.edu/amo-microelectronics>

# More Lessons Learned

## True Definition of Energy Efficiency Scaling

- The Parable of “Stone Soup” applied to ~50% of energy efficiency scaling
- A fair amount of Expert labor is needed

## To do from Yesterday

E. EES2 Secretariat Activities (Recruitment (we need YOU to help!), Redesigned webpage, Newsletter, Wikipedia, Book Club)

# EES2 Secretariat Homework (August & Beyond)

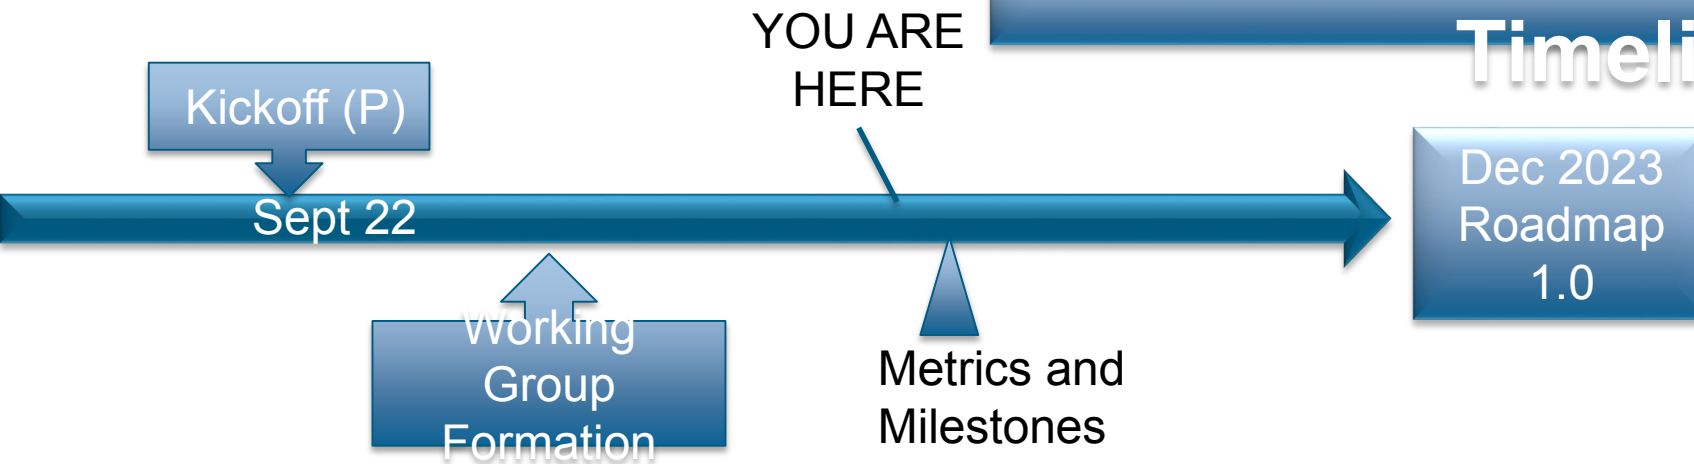

1. Overall Management including Non-Roadmap Milestones
2. Keep Recruiting (thank you Farah!) and identifying targets
3. Launch Wikipedia Page and Newsletter/BLog (C)
4. List (expected) Federal Microelectronics Funding Opportunities DOE, DOD, NIST, and NSF CHIPS
5. Write articles and response letters—update White Paper (C)
  - First Broad EES2 (IST), Technical letter on Analysis (Sadas) drafted and submitted! SLAC newsletter URL provided
  - leading to EES2 Goal for Working Group members to sign (A)
6. More, Better Data on Microelectronics Energy Use (EIA, DOC) and pledgers energy use
  - Meetings and input to EIA Energy Use Surveys
  - Create energy data feedback form for Pledgers (A)
7. Develop ideas for projects with Performance Benchmarking Organization on Efficiency (WG)
8. Microstructure Infrastructure and other Prizes that target key segments such as students and retirees
9. Develop Fall Event for Pledge Partner Senior Officials? (C?)
10. Set up Speaker Series for Post WG Workshop Plenaries (C?)
11. Write non-WG part of Roadmap (C,P)
  - Create separate teams comprising xsection of WG members and other)
  - List (and Justify) what we're NOT including in version 1.0 of roadmap—e.g. Communication/ Wireless
12. Come up with new excuse to update Social Media kits include tweets, LinkedIn, FB etc (C)
13. Develop Prize and Fellowship Proposals
14. Update BookClub

# Put EES2 To Do List on a Timeline

## EES2 Roadmap 1.0 WG Timeline

## EES2 Secretariat & Communications Timeline

# New Webpage Sections—

- WG Highlight in Each Monthly Meeting
- Aug 16-17 EES2 Final WG Meeting

- Monthly Highlight Presentation

– (Teams)

- Monthly Summary/Discussion

# EES2 Working Group Homework for August

Working Group	Materials & Devices 	Circuits & Architectures 	Het Intg Adv Pkg 	Metrology & Benchmark 	Power & Control 	Software Algorithms 	Mfg Energy Efficiency 
Co-chair Point for April 2023	<b>Shashank John?</b>	<b>Azeez Emre?</b>	<b>Josh Fryman?</b>	<b>Jim Booth</b>	<b>Phil Sharps</b>	<b>Brian Hirano</b>	<b>Steve Putna?</b>
Working Group Highlight Month	March Thank you John	April Thank you Azeez And Emre	May Thank you Na Li and Moinuddin	August I	July- Thank you Paul!!	<b>July Thank you Brian</b>	June Thank you Prashant!

....potential crosscutting teams??

# We can DO This!

- In the short- and medium-term
  - Both S&WGs Must detail linkage between meeting EES2 goals and other government mission technical goals to get resources for Roadmap
- For the long term –getting from 100X to 1000x
  - Microelectronics Infrastructure Reinvention needed for nature-inspired
  - Also quantum, carbon-based and photonic

---

Thank you!

Q&A and Discussion
